

Loan Data Verification Copilot

LINEAGE, AI DIAGNOSTICS & CRYPTOGRAPHIC PROOFS

A security-hardened fintech auditing workspace resolving format normalization discrepancies, validating portfolios against 15 configurable business rules, and attesting data integrity via canonical SHA-256 hashes.

Presenters: **Mridul Rajgaria** & Panya Kapoor

Platform: **React** • **Node.js** • **Prisma** • **SQLite** • **Claude 3.5**

The Mortgage Tape Integrity Challenge

Capital market aggregators receive loan files from fragmented networks. These files contain structural defects, formatting inconsistencies, and critical usury violations.

Double-Pledging & Compliance Risk:

Without validation checks and cryptographic locks, database records are vulnerable to unlogged edits, exposing lenders to double-pledging and regulatory penalties.
